All preparations for external use, including ointments, plasters, liniments and certain solutions, should be of safe, maximum strength for application. 4. For ointments, there should be duplicate or triplicate preparations, of the same active content but differing in base, so as to allow an organic fat and a mineral salve to be used at will, as well as, perhaps, an absorptive ointment containing wool-fat. 5. The physician should never be compelled to consult a pharmacopoeial list to determine whether such and such a preparation of any particular drug be officinal. Every galenical should be officinal for every drug to which it is applicable....
