Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Practical Uranalyses The uranalysis should be regarded as a necessary part of every diagnostic examination. Until this is done, the sick man will be denied a large part of that which scientific medicine offers him. A period of renascence passes rapidly, and we see at hand a realization of the prophecy of Osier, It will be done more and more when we send out our students familiar by long practice with the use of the microscope and other instruments of precision. Where antilogia, or a combination of contradictory symptoms rendering diagnosis uncertain, has existed, we have wished to call in everything which medical chemistry, microscopy, and bacteriology have given us; and it may be ventured that until this situation has confronted the average practitioner, has he been willing to look to the laboratory for aid. Inasmuch as uracrasia, or a disordered state of the urine, is commonly met in disease, it is probable that the uranalysis is more frequently attempted than any other one piece of laboratory work.
