Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Waters Within the Earth: And Laws of Rainflow An abundant supply of fresh water is so essential to all the activities of life, that everywhere the question of rainfall is regarded with the keenest interest, and stations have been established throughout the world for keeping accurate records of the times and amounts of downpour. These observations, however, go no further than the surface of the ground. They tell us nothing about the subsequent history of the water as it journeys onward through the dark recesses of the earth! How much of it is taken up by evaporation? How much is needed to satisfy the demands of plant-life? Much less do they give the faintest idea of what quantity reappears in lake or stream after months of unseen flow? Our research has the twofold object of supplying the missing history and developing the laws of subterranean flow, or, more concisely, rainflow. The standard for measure and comparison will be the household well, because it is found in every country and affords a ready access for underground...
