Not illustrated. 1917 Excerpt: . . . residence. 1917 Deatha by Principal Causes, According to Locality and Age During the first twenty-eight weeks of this yc. ir, 8, 415 infants died, a rate of HI n-rTnoo births. During the corresponding weeks of last year, h, 824 died, a rate of 93 Infectious Diseases in the Health Departments Hospitals. FEEDING CHILDREN FROM TWO TO SEVEN YEARS OLD. A recent survey of the leaflets of advice on dietetics and food economies disclosed the fact that much was being said about feeding babies and adults, but that little attention was being paid to the very important group in the community, namely children from two to seven years of age. At the request of the Department of Health a leaflet has been prepared to meet this need. It represents a large amount of careful work by four members of the Health Departments Advisory Council, namely Drs. L. Emmett Holt, Graham Lusk, Linnaeus E. La Fetra, and Godfrey R. Pisk, and constitutes an authoritative statement. The computation of food prices was made by Dr. F. C. Gephart. The leaflet is designed especially for the use of visiting nurses, social service workers, and others who come into close contact with those who are most in need of instruction in food economies. We feel certain that our readers will be glad to avail themselves of this information, and we therefore reproduce the leaflet in full. Extra copies of the leaflet will be printed and may be had on application to...
